

Product Design Bootcamp

Mastering UX and UI Architecture on Liferay DXP

COURSE OVERVIEW

The **Product Design Bootcamp** is an intensive program tailored specifically for digital product designers, UX/UI specialists, and solution architects working with **Liferay Digital Experience Platform (DXP)**. Choosing Liferay DXP as your primary digital foundation unlocks powerful capabilities, but maximizing its potential requires aligning your design vision directly with the platform's native architecture.

This bootcamp bridges the gap between creative experience design and technical reality. Participants will learn to leverage Liferay's robust out-of-the-box UI elements, Master Pages, Style Books, and Fragment architectures to build cohesive, highly scalable, and accessible user journeys without reinventing the wheel.

BOOTCAMP MODULES

Module 1: The Liferay Design Ecosystem

Understand native design paradigms, themes vs. fragments, and mapping user personas to Liferay Site hierarchies.

Module 2: Design Systems & Style Books

Creating atomic design frameworks inside Liferay using Style Books to control typography, spacing, and brand identity globally.

Module 3: Modular Layouts & Dynamic Content

Mastering Page Templates, Master Pages, and building visual, reusable Content Fragments for non-technical content creators.

Module 4: UX Best Practices for Complex Portlets

Designing intuitive multi-step forms, personalized dashboards, and interactive user experiences utilizing Liferay Objects and Forms.

Duration:	4 Weeks (Self-Paced / Live)
Platform:	Liferay DXP 7.4+
Target Audience:	UI/UX Designers, Analysts
Prerequisites:	Basic HTML/CSS & UX Fundamentals

KEY LEARNING OUTCOMES

- ✓ **Platform Efficiency:** Design experiences that natively map to Liferay capabilities, significantly reducing custom development cycles.
- ✓ **Consistent Branding:** Maintain enterprise-grade visual consistency across multi-site instances using unified design systems.
- ✓ **Empower Creators:** Build reusable, flexible layouts that allow marketing and business teams to launch custom experiences rapidly.
